

### PC-based solution for today's multi-payment requirements

This powerful, flexible solution combines transaction processing for major credit cards, private label, commercial cards and check services into one, easy-to-use PC-based system. Global Payments' Retail @dvantage PC is ideal for merchants who need a full-featured, cost effective system to process, authorize, verify and capture multiple payment transactions.

Retail @dvantage PC allows transactions to be processed in real time or in batch mode. Additionally, a multi-user option supports transaction services for multiple businesses on a single PC or with multiple users and workstations on a LAN. Multi-transaction processing services are available and can be used to accumulate recurring and non-recurring transactions.

This robust system also offers a comprehensive set of reports and reviews for accurate and complete transaction history. In addition, as with all Global Payments solutions, well-trained customer help desk support is available 24 hours-a-day, 365 days-a-year.

#### Key Product Features

- Authorization and settlement of all major credit (consumer and commercial) transactions through a single software solution
- Level II data captured on commercial card transactions
- Optional check services including check guarantee, verification, and recovery services
- Allows card payment recurring file creation and editing capabilities
- Includes card swipe and receipt printing capability for walk-in customers
- Provides suppliers with multi-merchant account needs, either to accommodate both retail, e-Commerce, and/or card-not-present requirements or to differentiate between multiple accounts and work stations in the same office or location
- Confirms the cardholder address and account number via Address Verification Service (AVS) and supports card truncation
- Supports eCommerce indicator for Internet-initiated purchases

### Worldwide, World-Class Transaction Processing

Global Payments is a registered trademark of Global Payments Inc. and may not be copied, imitated, or used, in whole or in part, without its prior permission. All other trademarks, registered trademarks, product names, and logos identified or mentioned herein are the property of their respective owners.

#### Benefits

- Saves valuable time and money with IP VPN connectivity option by utilizing existing high-speed Internet connections, quick response times, and the ability for multiple PCs to share one connection to Global Payments
- Improves merchant cash flow for commercial customers by reducing payment receipt time from 30-60 days to two-to-three business days
- Reduces collection expenses through electronic authorization and guaranteed payment processing for check services
- Reduces bankcard costs by supporting compliance requirements for best interchange including: Visa® CVV2, MasterCard® CVC2, American Express® CID, and Discover® CID card verification for check services
- Reduces overhead by automating recurring transactions and providing service support
- PABP (Payment Application Best Practices, inclusive of PCI) system compliant

### Minimum System Requirements

- Pentium Class Processor
- Windows 2000 or XP
- 128 MB RAM (Application requires 8M and 16M of RAM, respectively)
- 10 MB free disk space (25 MB with IP VPN)
- SVGA (800x600) color monitor
- CD ROM Drive

### Optional equipment includes:

- Modem – 1200/2400bps\*
- Magnetic stripe card reader (serial or USB)
- Local Area Network (LAN)
- Telephone handset
- Windows compatible printer
- e<sup>N</sup>-Check 2500 check reader (serial or USB)
- High-speed Internet connection for IP VPN option

\* Modems, whether internal or external, must be Hayes-compatible or a Windows modem that supports 1200- or 2400-baud rates with the MNP protocol disabled. Modem is required for processing Global Check using optional check reader.
