

## Payment Processing

### Transaction processing and real-time, online reporting capabilities

Global Transport – VT is a secure, virtual terminal (VT) solution for processing all major credit, debit, and EBT cards with fast transaction times. This offering allows the user to be configured for Recurring Payments in an automated fashion. In addition, the user has online access to real-time transaction data. The VT application offers data retrieval and management information reporting 24 hours-a-day.

This dynamic solution is available through a Windows™ XP PC, utilizing Internet Explorer™ 6.0 or 7.0. Using this solution, retail, restaurant, mail order/telephone order, and eCommerce merchants have immediate, convenient, and secure access to transaction processing and can obtain critical, current and historical business information with “point and click” ease.

As with all Global Payments processing solutions, well-trained customer help desk support is available 24 hours-a-day, 365 days-a-year.

#### Features

- Complete browser-based transaction processing and real-time reporting of critical information
- Supports recurring billing transactions
- Supports simultaneous users by providing unique login information for each clerk/server accessing the same terminal ID and/or batch
- Provides dynamic search engine to review individual transactions or a set of transactions
- Employs industry standard secure data encryption technology – 128-bit Secure Socket Layer (SSL)
- Handles an unlimited number of transactions
- Supports magnetic swipe readers and PIN pads
- PABP (Payment Application Best Practices, inclusive of PCI) system compliant
- Supports multi-store or multiple accounts

#### Minimum Requirements

- Windows™ XP
- 1 GB RAM
- 30 MB Uncompressed disk space
- Pentium 4 Processor or higher
- Internet Explorer 6.0 or 7.0
