

PC Charge

Card Acceptance Software That Improves Business Performance

The proven way to transform any PC into a powerful, secure payment device.

SCREEN GALLERY

PCCharge software turns any PC or PC-based POS system into a secure payment-accepting device. It supports a wide range of peripherals, making it easy to accept all payment types including credit, debit, EBT, checks, stored value/loyalty, purchasing cards (level II), Interac, and more. **PCCharge** is a cost-effective solution for all business types including brick-and-mortar merchants, e-commerce, MOTO, and QSR/restaurant.

Through its intuitive GUI, **PCCharge** allows merchants to easily maintain a customer database, manage recurring or installment billing, and run robust, business-friendly reports.

PCCharge is a PAPB 1.4 validated solution that features many security safeguards and anti-fraud controls. Through its use, merchants are one step closer to achieving PCI (Payment Card Industry) compliance and protecting their business interests.
